

Entertainer Data Analysis

Wireframe Documentation

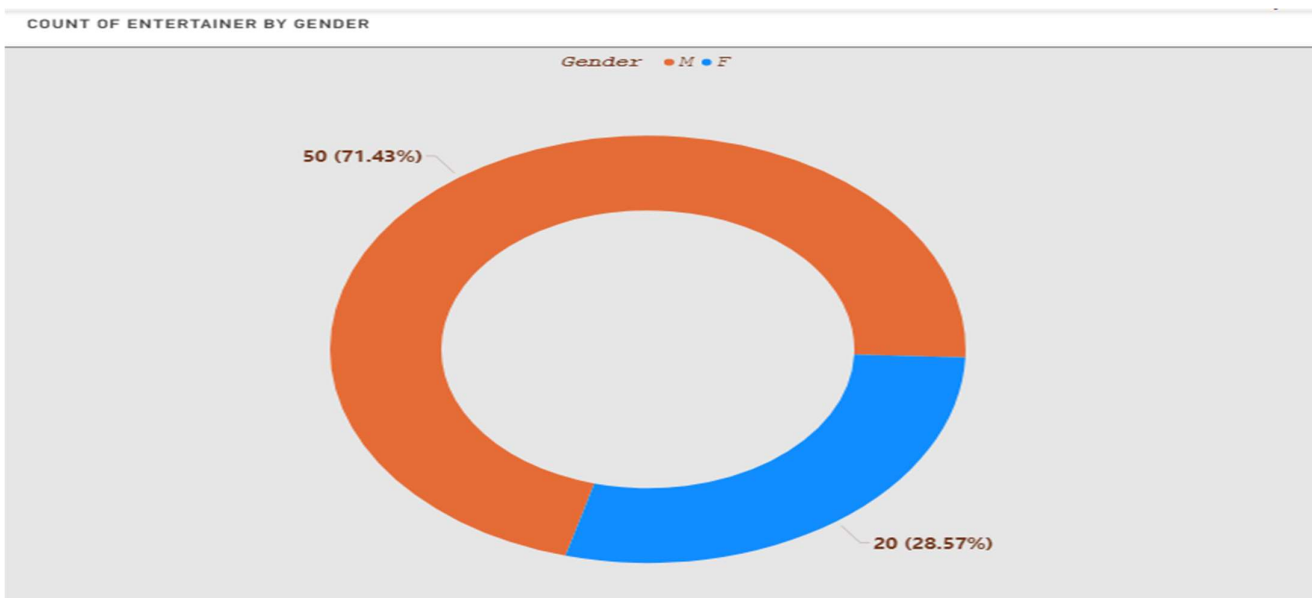

Homepage

Dashboard 1

- ❖ In first dashboard I try to give basic information about the Entertainer life in an attractive way. Here I don't try to extract useful information, here I just try to understand what is the basic concept of this data.

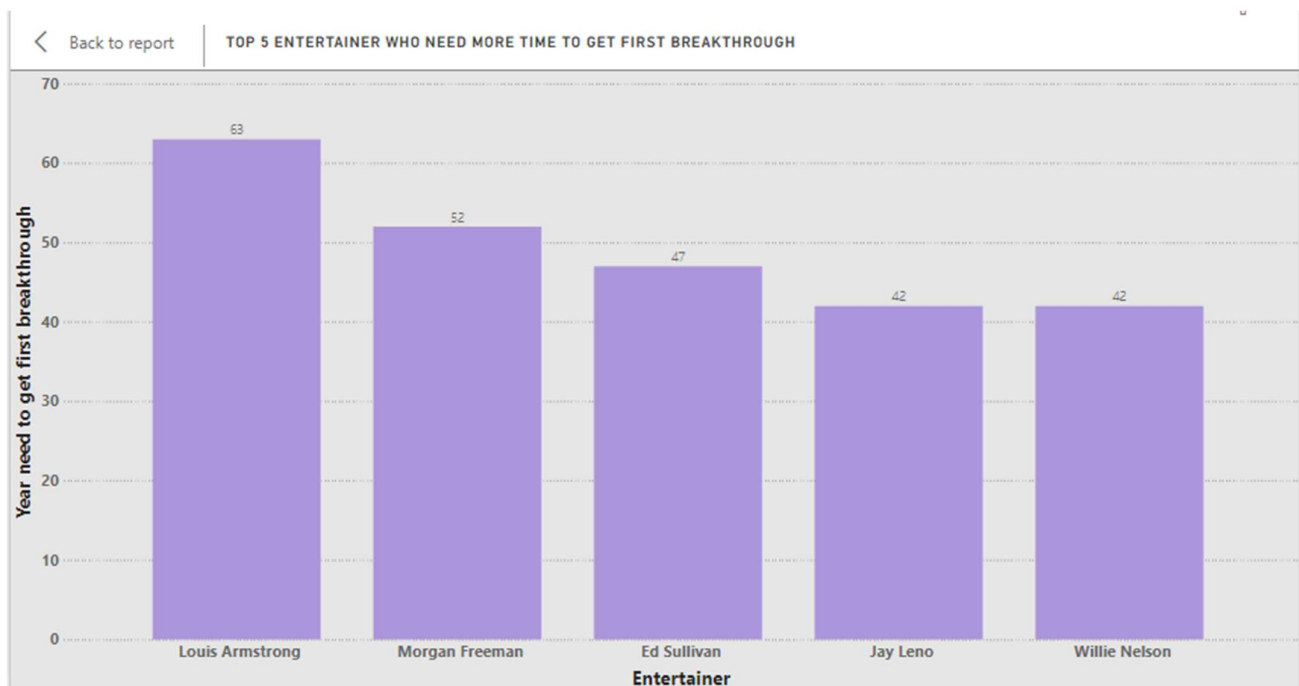

- ❖ let's try to understand the charts of the first dashboard

- ❖ This donut chart shows that there is approx.71% male and approx.29% female entertainer

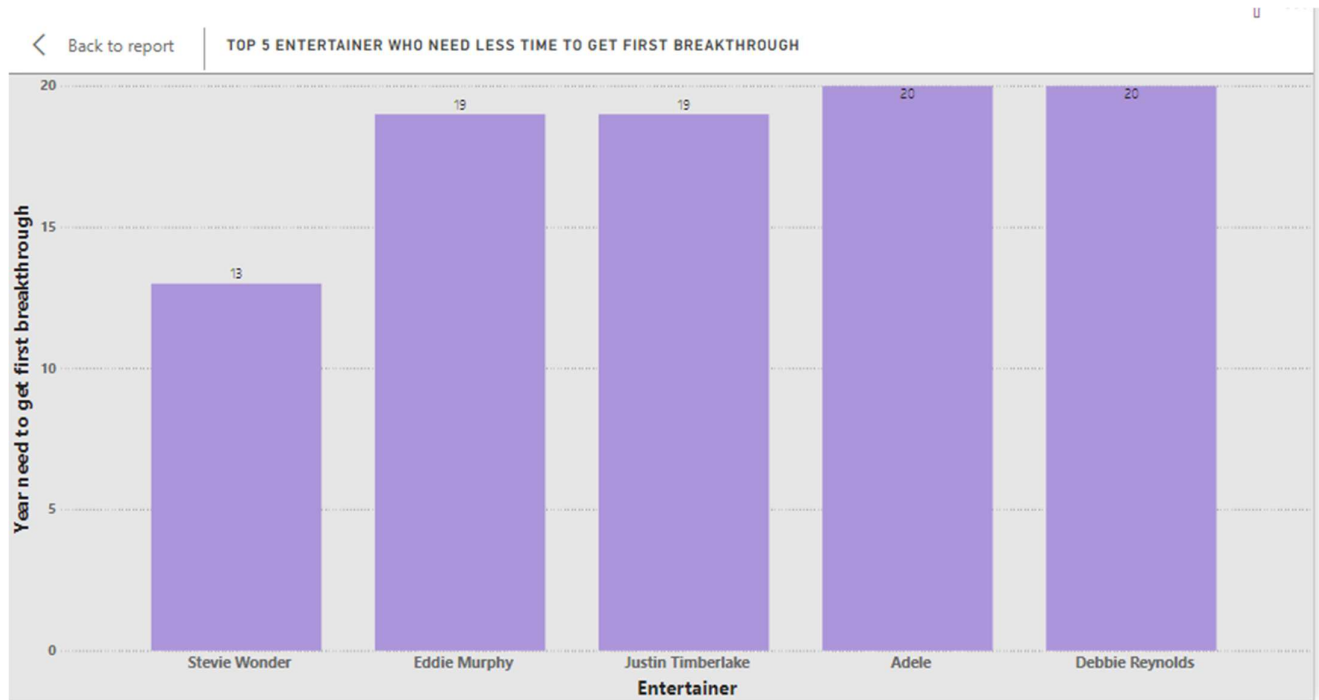

Entertainer Name	Birth Year	Breakthrough Movie Name
Humphrey Bogart	1899	The Petrified Forest
Total Year to get first Breakthrough	Major Award since first Breakthrough (year)	Year of Last Major Work
37	15	1956

- ❖ This are dynamic cards that shows the basic information about the entertainer life Like his birth year, breakthrough movie name, years to get first breakthrough, Major award since first breakthrough etc.

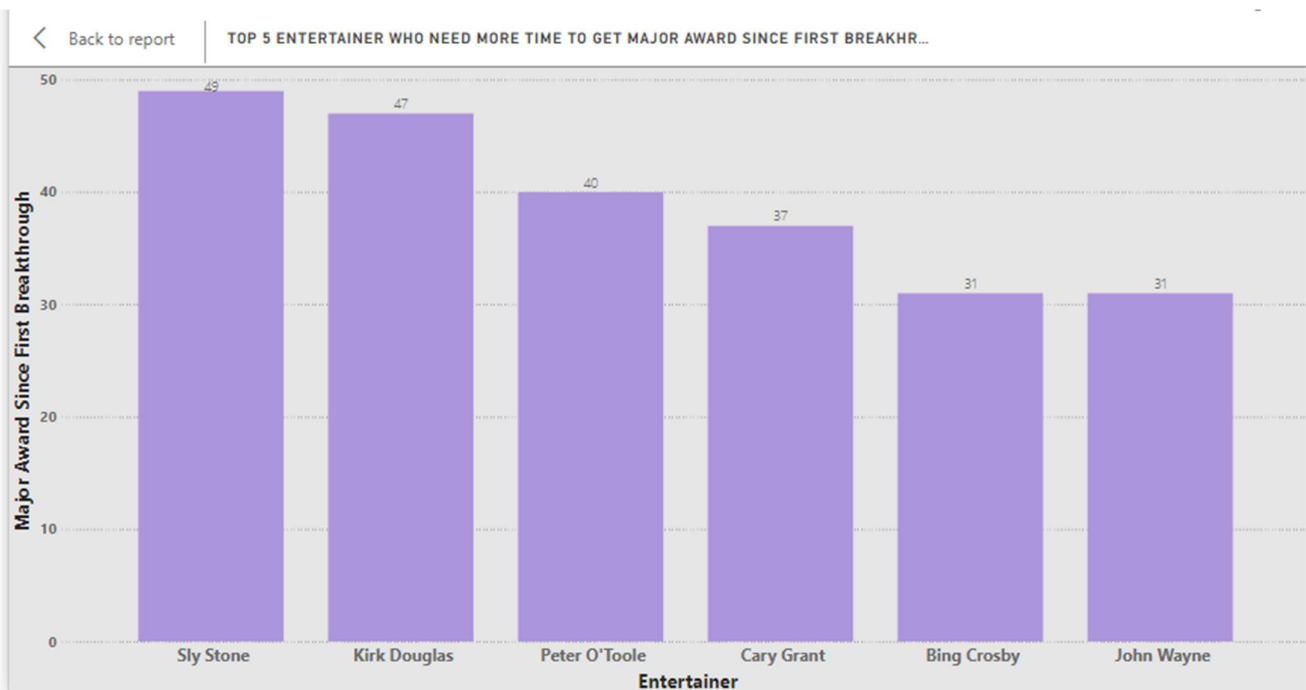

- ❖ This bar chart shows top 5 entertainer who needs more time to get first breakthrough
- ❖ Louis Armstrong gets 63 years to get his first breakthrough

NOTE - I calculate the above year by just subtracting the breakthrough year with birth year.

- ❖ This bar chart shows top 5 entertainer who needs less time to get first breakthrough
- ❖ Stevie wonder needs only 13 years to get first breakthrough

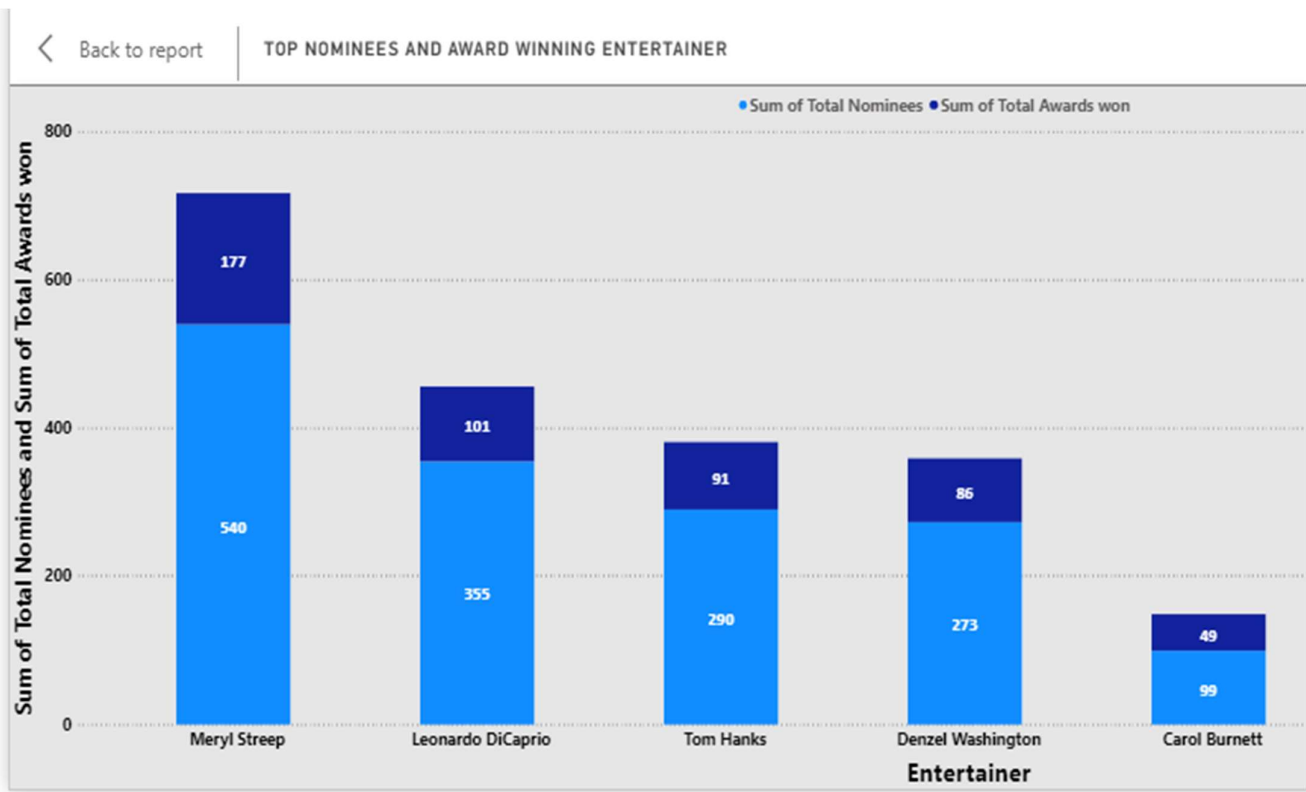

- ❖ This bar chart shows the top 5 entertainer who need more time to get first major award since first breakthrough
- ❖ Sly stone takes 49 years to get first major award since first breakthrough
